

PRESS RELEASE

Mobile Expertise launches new data radio at IWCE

UK-based Mobile Expertise (ME*), the data radio design & manufacturing company, is launching its new data radio D-350 at IWCE this year (10-12 March 2010). ME* can be found at Booth No.2109.

The D-350 data radio is 1-5W programmable with additional modulation options, operating at frequencies 146-174MHz, 400-440MHz and 440-480MHz, and is FCC approved. Benefiting from the same high standards of design and production of its sister products, the D-350 is both rugged and reliable, and is suitable for use in a wide range of point-to-point and point-to-multipoint data/telemetry applications.

Andrew Smart, Business Account Manager at ME* says, "The launch of the D-350 is a very exciting event for us, and we can think of no better arena than at IWCE. The USA is a very important market for our company and we are thrilled to return to the show after our successful debut last year.

"We are looking for business partners who can either distribute or integrate our products, and we will be making use of IWCE to demonstrate what makes us different."
