

PRESS RELEASE

Mobile Expertise debuts at IWCE

UK-based Mobile Expertise (ME*) is exhibiting at IWCE for the first time this year (18-20 March 2009) and can be found at Booth No.1876.

Specialists in high performance and cost effective methods of sending and receiving data, ME*'s range of 5W UHF and VHF modems are leading the field.

With a growing customer base around the globe, ME* develops and manufactures point-to-point solutions, specialising in:

- Wireless data products, including Mobitex
- Two-way radio products

Companies looking for a high performance and cost effective means of sending and receiving data, must check out the company's ME-D150. Small and robust, the ME-D150 is a 5W UHF and VHF modem with the potential to make a company's data comms strategy a global reality.

Robert Johnson, director of ME* says, "Exhibiting at IWCE is big news for us as it provides an opportunity to showcase our full range of modems, as well as launch our newly developed ME-D350 to the US market. With the ability to be implemented globally, without the need to re engineer, the ME-D350 is designed and tested to FCC regulation standards, and benefits from the same high standards of design and production of its sister products.

"As an expanding company we're always looking for new distributors and with many of the industry's movers & shakers attending, we hope that contacts will be made at the show to help expand our distribution base."
